

# DIDSBURY PIONEER

VOL. XXXI. No. 84.

DIDSBURY, ALBERTA, THURSDAY, AUGUST 23, 1924

\$2.00 per year. 5 cents a copy.

## Stop Signs Erected.

In accordance with a new by-law passed recently, making every Didsbury street leading onto the main highway a "stop street," stop signs were put up Tuesday on the right-hand corner of each crossing, where a stop sign is required by the law. "No Parking" signs have also been erected on certain streets.

Drivers are asked to carefully observe these signs, as the town is prepared to enforce the by-law in every case.

## Mr. H. Roberts Arrives Home From Old Country

Mr. H. Roberts, who went to England in June with a shipment of Holstein cattle under direction of Alberta Holstein Association, arrived home Friday last.

Mr. Roberts states he found conditions picking up in the Old Country and had good success with the sale of his shipment of cattle.

On his return trip from Montreal he states that there was no evidence of a good crop until Winnipeg was reached. From Montreal to within a 40-mile radius of Winnipeg, he said, farmers were cutting weeds for feed. From Winnipeg to Gleichen there was hardly a crop worth speaking of. Mr. Roberts says it is sure good to get back to Didsbury.

On arrival at his home he was sorry to learn that he would have to place his youngest child, who is seriously ill, in the Didsbury General Hospital.

## Sports Day Financial Success

A good supply of music is assured the Boys' Band as a result of the recent sports day, when slightly under \$20.00 was cleared.

The executive and members of the Band wish to express their appreciation to all who attended the sports, and to the many willing helpers who worked all day to make the sports a success.

## One Killed, 7 Hurt In Auto Collision on Calgary Street

One person was killed, two seriously injured and five others escaped with superficial injuries, bruises and shock when an automobile, driven east on Twelfth avenue by Robert C. Phillips, automobile dealer, Toronto, crashed into another automobile driven by W. H. Parrish 3835 Seventh street west, Calgary, at the intersection of eighth street west. The accident occurred at 12:10 o'clock Sunday morning.

Phillips surrendered himself at 2:10 o'clock Sunday afternoon and was remanded at police headquarters on a charge of manslaughter, was formally charged with that offence on Monday morning, and was allowed out on bail of \$10,000.

Police allege that the accident was caused when Phillips failed to stop at the stop sign at the intersection. Parrish was proceeding south on Eighth street west, and was crossing the intersection at Twelfth avenue when Phillips' car, eastbound, crashed into him.

Mrs. Clemes and Mr. Beach, who were riding in the right side of the Parrish car, received the full force of the impact and the former was almost instantly killed.

The force of the collision threw Parrish's car right across the intersection, and when residents of the district, alarmed by the crash and the screams of the injured, hurried to the scene, they found that both cars had piled up on the telephone poles and the injured occupants were strewn all over the intersection.

Mrs. Clemes was pinned beneath the wreckage of the Parrish car and the screams of the injured, hurried to the scene, they found that both cars had piled up on the telephone poles and the injured occupants were strewn all over the intersection.

Beach, although conscious was seen to be suffering from severe injuries to the middle part of the body. He suffered extreme pain while being removed from the wreckage but never lost consciousness.

## Wins \$200.00.

Bill Jenkins was the lucky winner of the 1st prize at the Three Hills Elks' dance at Keiser's Lake last Wednesday evening.

He had his choice of a new binder valued at \$265, or \$200 cash. Bill elected to take the cash.

## First Threshing.

The first threshing reported in the district to date was done by Mr. J. W. Brown last Thursday. He stated that his wheat graded No. 2. Mr. Brown also threshed some barley.

## Allow Open Season on Ruffed Grouse

Ruffed grouse have been added to the list of birds which may be shot during the open season, October 1 to 15, both dates inclusive, according to an amendment to the Game Act.

A bag limit of 5 per day or 25 per season will be permitted, and is the same as the limit for Blue Grouse, Spruce Partridge and Ptarmigan.

## Social Credit Study Group Holds First Meeting

The first meeting of the recently-formed Didsbury Social Credit Study Group was held at the home of the secretary, Mr. A. Schwenke, on Tuesday evening, with the president, Mr. Henry Erb, in the chair.

Great interest was shown, and each one present felt very pleased with the results of the meeting.

The other occupants of the Parrish car, Mr. and Mrs. Adams and Parrish and his wife, were less seriously injured. The latter were removed to the General Hospital for treatment.

In the other car with Phillips were A. D. Woodhouse of Edmonton and Miss Christina Strick of Calgary. Woodhouse was the most seriously injured of the three. He suffered a broken nose, possible fracture of the jaw, lacerations of head and neck, and shock. Miss Strick had one foot caught in the wreckage of the car and her shoe had to be cut away before she could be released. Phillips escaped without a scratch.

At Didsbury

## Former Didsbury Resident Hailed Out

Weekend reports state that the severe storms which swept through various points of the district last Friday did considerable damage in the Raven district. Mr. Willard Axtell was completely hailed out, losing about 70 acres of wheat, oats and barley.

## Hail Losses \$4,000,000.

Western Canada's hail losses have mounted over the \$4,000,000 mark, with scores of acres of wheat and coarse grains ravaged by the icy pellets.

Reports from southern Saskatchewan confirmed estimates of \$1,000,000 damage in hail losses to crops and property which swept a wide area last weekend.

Tuesday last \$500,000 damage was done by a hailstorm which cut an area 10 miles wide and 30 miles long in southern Alberta. Practically all losses in northern Saskatchewan and north central Alberta chiefly around July 10, caused a \$2,000,000 damage to crops. Other scattered storms, some in sections of Manitoba, were believed to have caused losses in the neighborhood of \$500,000.

## Dr. Liesemer Elected Acting Chairman

At a special meeting of the school board held last Saturday night, Dr. H. C. Liesemer was elected acting chairman in the absence of Mr. J. V. Berscht who is visiting in Ontario for a few weeks.

## Gravelling Work Proceeding

Under contracts already awarded, some 150 miles or more of gravelling and re-gravelling of existing highways have been completed, according to a progress report issued by the provincial public works department. This work is proceeding on some 27 sections of main highways in different sections of the province.

"BUY IN DIDSBURY"

## Commendation.

A stranger visiting this town was heard to comment on all the building activity he saw, and thought there was no sign of depression in the district. He commented on the fine-looking crops and the splendid farm homes, and said this was the finest district he had seen in the West.

Current rumors are to the effect that Mr. H. R. Friksen, new agent of the "G.G." elevator, has purchased the Bank of Montreal building and will utilize it both as a residence and for business.

This, on top of all the new buildings and improvements would signify that Old Man Depression is well along the corner and almost out of sight in this district.

## Will Prospect for Diamonds

First Time in B. C.

Prospecting for diamonds will be undertaken for the first time in British Columbia's history by Thomas W. Hindmarsh and George Osgood, both of Vanderhoof, B.C. License on two 10-acre pieces on the Nechako River, sought by the two men for this purpose, were approved Tuesday by the provincial cabinet.

Issued under the Placer Mining Act, the licenses cover precious stones generally. The men did not indicate, in making application for the licenses, to what extent they believed diamonds might be found.

## Demise.

Funeral services were held Sunday for William Phillips Stubbs, 4-year old son of Mr. and Mrs. Thomas W. Stubbs of Didsbury. The child died in Calgary on Friday August 17th.

The funeral service was conducted at the Knox United Church, with Rev. A. J. Mitchell officiating. Pallbearers were Allen Krebs, Carlton Lesson, Jim and Douglas Johnson.

BARNEY KLASSEN, Manager

## Character Makes The Man

In a little magazine sent regularly to the writer of this column through the courtesy and thoughtfulness of a friend, and which we always read with pleasure and profit, and from which we frequently quote, there recently appeared a short article that is both timely and worthy of consideration in these rather troublous days when we are inclined to place responsibility for all our ills upon governments, institutions, systems—in fact, upon anything and everything except our own human frailties. The magazine article referred to reads as follows:

"Most of the ingenious schemes for making this a better world fall down because they assume that man is an angelic creature who would dance singing through the streets, with garlands in his hair, if only the chains of circumstance could be stricken from him. The trouble is that man isn't an angelic creature. He can't be. He is a creature of the animal kingdom. When he's mean, he makes the sales-toothed tiger look like a domesticated tabby; and for ruthlessness he can bring blushes to the cheeks of a cobra. On the other hand, it's just as big a mistake to assume that man is all mean. He rises just as high as he falls. Nothing in the jungle can match him for courage and self-sacrifice. If he can be a beast, he can also be like those gentlemen who stood on the deck of the doomed 'Titanic,' singing in the face of death. As Byron said, 'a half devil and half deity.'"

For many years, almost a century in fact, it has been an accepted idea in all democratically governed countries that education was the royal road to sweetness and light. Practically no one questioned it. Laws were enacted making education compulsory, and more and more money was cheerfully poured into the providing of free education for all children, always in the belief that when people are educated, a golden age would dawn. People in all our so-called civilized countries are now fairly well educated, in the accepted meaning of that term, but the golden age has not arrived. Apparently, good and splendid as it undoubtedly is, education in itself is not the miracle-worker it was supposed to be. And the trouble is that we have confused book-learning with education, and have set such store on knowledge of facts that we have forgotten about character.

With many sincere people the tendency now is to rely on legislation to accomplish all the reforms which religion and education have failed to bring about in human relationships. Even some clergymen apparently believe that both education and the church have failed to develop human character and thus eradicate selfishness, meanness and dishonesty, but that where these powerful agencies have failed, parliaments and legislatures can succeed through the enactment and enforcement of man-made laws and governmental administration of purely man-made social and economic systems. This is a wholly false conception, and if our schools, colleges and churches could ever act upon it they would learn how too late how serious a mistake they had made.

Recognizing the truth of Byron's observation that man is half devil, half deity, the function of the church and of all forms of religion is to cultivate and develop the deity in man and thus seek to overcome the selfishness and meanness inherent in human nature, to inculcate the true principles of life and living, to teach the beauty, the joy, the happiness of true Christian living, in a word, to build up character.

And the function of schools and teachers supported as they are by the State is the counterpart of the church. It is not merely to impart knowledge but to so train the human intellect and develop man's reasoning powers as to enable him to think clearly, choose wisely, act with discernment and discretion and thereby attain to a full realization not only of his own rights and privileges but to a full appreciation of the rights and privileges of his fellow men, and of his own obligations to society as a whole; in a word to live as an intelligent, informed man of character should live.

Parliaments and legislatures have large and important duties to discharge, but under our democratic systems these legislative and administrative bodies will be, as they are intended to be, but a reflection of the views and opinions of the people as a whole. Thus churches and schools through the discharge of their accepted functions by raising the standard of intelligence and in the development of character, thus building up personal character and higher standards in thought and living, will beneficially affect all legislation and all administration. Much more of a permanently beneficial character can be effected in this way than by the definite commitment of churches and schools to any particular set of political policies, social reforms, or economic systems in a rapidly changing world.

If the people themselves are right, if they are men and women of character and conviction, if they are directed and intelligent, unselfish, honest and God-fearing, parliaments and legislatures, and the acts of these bodies will be a reflection of their views and convictions. But if the people of any nation are not of this type, neither will their governments be, and all the propaganda of churches and schools will not make them so.

If we would improve our institutions and systems and governments, we must begin about a steady improvement in people themselves, and in the bringing about of such improvement lies the first and paramount duty of our churches and educational institutions.

### Finding Ready Market

Demand From British Buyers For Canada's Dressed Poultry

Dressed poultry from Canada is finding a ready market in substantial quantities in the British Isles. From January 1 to May 31, 935,500 pounds have been exported, an increase of 537,122 pounds compared with the corresponding period of 1933. Meanwhile the demand from British buyers continues active for the quantity of the shipments have met the market requirements in every way, says an announcement from the department of agriculture.

Exports of Canadian cattle to Great Britain for the year ending June 28 totalled 23,667 as against 22,395 for the corresponding period of last year.

### Buys Deceitful Horses

Englishwoman Has Carried On Work For Twenty Years

Known only as the "Horse" Player," a woman in Edmonton, England, has bought thousands of old horses and donkeys and unfit wild ponies and had them slaughtered and managed to prevent them from falling into the hands of dealers and being under cruel conditions. At Burnet Fair recently she bought 90 animals, this year she has purchased \$89. The woman, who insists on remaining anonymous, has carried on her work for 20 years. She is assisted financially in her efforts by a few friends.

Next to London, Calcutta, India, with suburbs is the most populous city in the British Empire.

## Diarrhoea, Dysentery, Colic Cramps and Stomach Pains

Prompt treatment with Dr. Fowler's Extract of Wild Strawberry in such cases relieves the pains, checks the looseness of the bowels, and thus does away with the suffering, the weakness and often times the collapse associated with attacks of this kind.

It does this by checking the too frequent and irritating bowel action, settling the stomach and bracing up the weakened abdominal muscles, thus making it a remedy for the treatment of bowel complaints of both young and old.

On the market for 88 years you do not experiment when you use it.

Put up only by The T. M. Munn Co., Ltd., Toronto, Ont.

## An Era Of Suspicion

### Difficulties In The Way Of Achieving Universal Peace

In the world as it is to-day, to a greater extent even than in the days when Lord Meath and Lord Milner surveyed it—there are overwhelming difficulties in achieving anything like universal peace and freedom. For the moment an era of suspicious nationalism seems to make that ideal more remote than ever. But unquestionably the way to attain it lies through the gradual grouping of such nations as are prepared to link and trade together and to live at peace for all time with one another; and the one group ready formed for this great purpose, bound by all the ties of history, tradition and complementary requirements, is the existing group of the British nations and dependencies. To dissipate so vast a potential force for good would be something worse than folly. To dissipate it, as some of our Socialists are fond of doing, is to stultify their own professions. Surely the whole public group of the British nations in every capital of the Empire, whether they are Conservatives or Socialists, manufacturers or farmers, should be to consolidate it, to strengthen it, and to attract to it like-minded lovers of peace wherever they may be found. —London Times.

### New York Via Arctic

#### Proposed Air Route Would Find Favor With Aviators

The polar regions may soon become as familiar to British airmen as the Irish Sea or the Channel are to British seamen. The air-route to the Far East is nearly halved by proceeding via the North Pole. If direct, wireless proves the success hoped and expected of it, the 6,000-mile path between wireless stations at Thorshavn (Faroe Islands), Reykjavik (Iceland), Aunagsvik on the east coast of Greenland and Godthaab on the west, and Resolution Island at the southern extremity of Bahndland will come into favor with flyers for several well-founded reasons. If it should prove a reliable proposition to check direction on these sections by wireless, the skilled pilot could contemplate operation along this route in weather which at present would make it hazardous for him to be largely independent of fog and other forms of bad visibility. Besides, though the length of this route from England to New York is 4,500 miles, and therefore greater than the direct route, a great advantage lies in the fact that it can be divided into 600-mile stages.

## Ancient Reptile

### Sinuous Creature Which Flapped About Prehistoric Ocean

Officials of the National museum at Ottawa say the two enormous specimens unearthed at Morden, Man., by Dominion geologists, were the first complete skeletons of the 65,110,000-year-old reptiles ever found in Canada. Scattered bones were found in Alberta three or four years ago but to complete specimen.

J. M. Steinberg, Dominion government geologist, who has unearthed many dinosaur skeletons in Western Canada will ship the fossilized bones to Ottawa where they will be mounted for display in the museum. A 25-foot specimen has been on display at Ottawa for some years but it was found in the United States. It may be a year before the completed sinuous creature, which flapped about the prehistoric ocean that covered Western Canada millions of years ago, is ready for the gaze of the public.

### A Clever Idea

German ingenuity has solved the problem of looking over the heads of a crowd without getting a stiff neck. At every big street parade in Berlin now, and there is one almost daily, scores of vendors make their ways through the crowd selling periscopes. With a periscope it is possible to have a front seat even if you are standing in the rear ranks.

It is believed by the Ruler of Australia that the spirits of the dead ascend to heaven by the rays of the sun.

A few centuries ago, the word "idiot" was used to designate a "private citizen."

If you want a longer-lasting chew, get—

# BIG BEN

## Chewing Tobacco

### Reaping The Harvest

#### Far East Has Awakened To Machine Age Era

Europe no longer can exploit the rest of the world as a market, and now, after destroying the civilization of the Orient and India, reaps the harvest, declared Frederick W. Newell, celebrated preacher of the City Temple, London, England, at Vancouver.

Returning from an extended trip, he said the Far East had awakened to the machine-age era.

"In Japan you have a nation that has learned the lessons of western civilization, put them into practice and now is sending back a surplus of machine-made goods," he said.

The missionary was not to be blamed. There were he recalled, 100 commercial travellers promoting industrial ideas for every single missionary. There, too, were great changes in China and India.

"These people are increasingly conscious of what we have taken from them. We have got to think of humanity stop putting taxes on things and letting it go at that," he concluded.

### Canadian Voodooism

#### Human Credulity Provides One Of The Serious Barriers To Medical Progress

An article in "Health", published by the Canadian Social Hygiene Council, points out the necessity for the general public realizing that many so-called cures are nothing but fakes. The article tells some rather interesting facts about the credulity of people and the wiles of the fakir. The article concludes: "Perhaps it is futile to tell the public about these tragic occurrences, perhaps it is wasting time to ridicule the fakir and charlatan. Ethically the doctor can promise no one a cure but these medical gangsters, after getting their money, laugh at the hapless sufferers from cancer and the dying tuberculous patient and promise him a cure." Often times neglected cases too late accept the advice of their own surgeons and are handed at the same time a death certificate.

### Use Scalding Steam

#### Wardens Well Protected If French Convicts Attempt Mutiny

Scalding steam is always held ready for use on the two hundred and eighty convicts bound for the French penal settlement on French Guiana, which includes Devil's Island, which recently embarked in the convict ship La Martinique at La Rochelle. During the voyage the convicts are kept in cages under the constant surveillance of wardens, who, in the event of attempted mutiny, would be able to turn steam on them.

### Swimming And Health

#### An Exercise That Has Come To The Front As A Valuable Form Of Recreation

A well-known swimming instructor states, "The interest in swimming has been stimulated tremendously and it is now possible for people to indulge in this healthful recreation throughout the year."

Greater indulgence would naturally make the health of the nation greater. It may also be the means of saving the swimmer and another's life. As an exercise swimming has few exercises with which to be compared. It may be performed to suit the age and physical condition of the individual. "The art of swimming has also developed," marvelously," states a writer on "Health". In the early days the breast stroke and over-hand stroke were commonly used. The trudgen and angle over-arm stroke were next evolved. The writer outlines the methods of swimming and states, "Make up your mind that you will learn or improve." The crawl stroke is the most popular of all swim strokes. Champions all over the world use it and it is fast becoming the stroke for everybody. In explaining the crawl stroke attention is paid to position, breathing and practice. At this time of year swimming can be made easier by the reading of such an article.

Nearly 150,000,000 pounds of tobacco were grown in China last year, providing all production records for the weed in that country.

#### CHAPTER I.—Continued

Gillis rose with an embarrassed air. "Here I am talking about you and I travelling together. I guess you're one of them tourist fellows, and I don't suppose you want to go along with a rough-neck like me."

Donald liked this big, bluff Westerner, with his honest face and simple manner. He reached in his pocket and took out the money the sheriff had given him.

"You see that? Well, before this money is gone I'll have to find a job. And it's borrowed money, too."

Gillis studied him carefully. "Well, you got my goat in a way, but there is one thing I do know, and that is that you ain't no slicker. I'm 'bout twice your age, and I know a good face when I see it. I'll meet you to-morrow mornin' at the station. I'm goin' to start callin' you Donald right now. And what's more, Jack Gillis is your friend from now until hell freezes over. Good-night, Donald."

#### CHAPTER II.

Two days later Donald and the Westerner boarded a C.P.R. train in Montreal for the West. They were no sooner comfortably seated in their section of a tourist sleeper than they began rushing westward through the winter evening.

The days that followed were full of interest to Donald. The train roared West, running on time like a clock. They tore through towns and farming settlements and plunged into forests and hills in the heart of the continent. The hills descended as they reached Manitoba, and in Alberta Donald felt as if he were sailing over a vast sea of land.

"Well, see them old Rocky Mountains pretty soon," said Gillis happily. "You'll like 'em," Donald said. And after you bin there awhile all hell won't pry you loose. I know, 'cause I broke away from her twice but I always drift back. I ain't got the education to tell you the funny part. I have when I'm comin' back to her. When I see them big mountains

## GOOD ADVICE FROM MOTHER OF SEVEN

Recommends Lydia E. Pinkham's Vegetable Compound

"Toronto, Ont.,—'I began taking Vegetable Compound for nerves and other troubles and I must say I felt different after the first dose. I have been told this last six months that I should take it, and although I am now forty-seven and have had seven children, I have taken the Vegetable Compound regularly for some time and sleep well, rise early and feel young.'—Mrs. McKel, 14 Laurier Ave., Toronto, Ontario."

W. N. U. 1752

that he would have barely enough to tide him over the weekend.

With all his assets in the way of clothes and jewelry in a pawnshop, he could not stave off the inevitable, and there came a day when he had not even the price of a meal. Too proud to ask for a loan, he went without breakfast and lunch.

At the beggar's employment agency he was told the same old story: "Only men of experience wanted. But," the agent added hopefully, "men are going to be scarce this summer, and they will be taking on everything before long." Donald made the rounds of the engineering firms where he had applied for a position, but without success. Force of habit led him back to the employment agency, where he sank disconsolately in a heap.

A diminutive man with blond hair, bright blue eyes under shaggy brows, and his head set at a cocky angle, entered briskly and approached the wicket. "Sir, do you know where I can find an 'easy-weight' cat who can box a bit?" he said to the agent.

"How about those two I sent you yesterday, Andy?"

The one addressed as Andy made a gesture of disgust. "Those two blighters were as 'easy as crows. They didn't know their right 'and from their left. I don't want any 'human punching' job. I want a man that 'as a little speed. Blime me, if I was in Australia I could get 'arf a dozen in 'arf a minute."

"In your mind," said Donald stepping forward.

The small man turned. The keen eyes under the bushy, light-coloured eyebrows studied Donald carefully. "Can you box?"

"I can."

"Good! Come with me."

Donald followed the sturdy little Australian. For a few blocks they walked in silence.

"Ad your dinner?" queried the Australian.

"No."

"Well, 'ave a bite in 'ere."

They turned into "Old Joe's" restaurant.

"Sands good to me," observed Donald with a pleased smile.

"Been missin' a few meals, 'ave you? Order what you want," said the Australian, as they sat down to a table.

"I'll warn you that I'm hungry," cautioned Donald.

"Op to it, my lad; about all we got in this blinkin' world is what we eat. What's your name?"

"Donald McLean."

"Mine's Andy Pettray."

## When your Children Cry for It

There is hardly a household that hasn't heard of Castoria. At least five million homes are never without it. If there are children in your family there's almost sure to be of the comfort. And any night may find you very thankful there's a bottle in the house. Just a few drops of this little orl of constipation is relieved, or diarrhoea checked. A vegetable product, a baby's favorite, and for young folks, Castoria is about the only thing you have ever heard doctors advising to take. Strongly recommended, and dangerous to a tiny baby, however harmless they may be to grown-ups. Good old Castoria! Remember the name, and remember to buy it. It may spare you a sleepless night. It is always for use, in emergency, or for everyday ailments. Any hour of the day or night that baby becomes fretful or restless, Castoria was never more popular with mothers than it is today. Every drugist has it.

**Fletcher's CASTORIA**

## Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless, most efficient way, is to take a little of the standard for physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use acids methodically when you know this better fact. And you will never suffer from excess acid when you prove out this easy fact. Please do that for your own sake now.

Be sure to get the genuine Phillips' Milk of Magnesia containing six grains of 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

"Then Andy delivered himself of the following information: 'I'm the manager of Bill Hagin, the Australian 'easyweight. We are to fight Sluggo, Garrieta, The Canadian champion, in about two weeks. The Sluggo is well named, as he is really 'fiter and it takes a good boxer to beat 'im. I want an 'easy man that can speed Bill up a bit, and I've 'anted this town over, but I can't find one. Now, if you can deliver the goods, you will be worth three dollars a day and your odds. What do you say?'"

"I say 'yes,'" was the decided answer.

Andy dug into his pocket. "Here's three dollars to bind the bargain."

"Better wait until I earn it," suggested Donald.

"That's all right, me lad; you'll needin' it to eat on, I ain't worryin'."

"Come to the gymnasium at the corner of Robson and Granville at two o'clock to-morrow," added Andy as they stepped outside.

"I'll be there and I want to thank you for your kindness."

"Forget it," smiled Andy. "I've been 'arf a hour a time myself."

"Half an hour ago I was broke and hungry," said Donald, "and now I'm well fed and have three dollars in my pocket. Great old world this!" He chuckled happily as he swung down sun-splashed Cordova Street with a buoyant stride.

To Be Continued.

## Teeth and Health

Issued by The Canadian Dental Hygiene Council and Published by The Dental Association of Canada

TOOTH STRUCTURE

You examine the highly polished clean tooth surface and you conclude, and rightly so, that the enamel does not persist all the way through. As the bacteria to the teeth, the enamel is to the tooth its protective covering, but serving as well, the purpose of covering the tooth body.

In the tooth, this body which constitutes the main bulk of the tooth is known as the dentine.

Then is this all? No, for as in the tree we have a pith or core, so in the tooth, the dentine, which is the heart of the crown of the tooth, as the pulp chamber, and in the root, as the root canal.

But you have observed too, that the enamel covers only the exposed portion of the crown, or crown. The root, then, is protected by a covering known as cementum, which attaches the myriads of fibrils or threads, that hold the tooth firmly in place in its socket.

Nature, ever wise, has constituted the enamel the hardest substance in the human body, to better withstand the stress to which it is subjected. Also, enamel does not undergo the physiologic changes of dissolution and repair to the extent of any other body tissue, hence the need of hardness as an effective barrier to injury and disease.

In the denture are minute tubules, or canals, containing soft tissue filaments through which communication is established from the outside of the tooth to the nerve tissue of the pulp, and because of this honeycombed structure and too, owing to dentine being softer than enamel, it is less resistant to disease than is the latter.

So you can see how important it is to keep intact the enamel which constitutes the chief defence of the tooth since disease processes, once penetrating the enamel barrier, can reach the dentine to the most vital tissues within and there proceed apace to work disaster.

German youths are not so tall now as in the pre-war days. The general decrease is about 1 1/2 inches.

Athletes—Keep Murrell's Limbaid handy

## Little Helps For This Week

## Prevent Accidents By Observing The Stop Signs

The most serious car accident  
to occur in Calgary in recent  
years resulted in the death of one  
lady and severe injuries to seven  
other people. Alleged failure of  
Robert C. Phillips to observe a  
stop sign early last Sunday morn-  
ing is said to be the direct cause  
of the accident and as a result  
Phillips is formally charged with  
manslaughter.

Stop signs are installed to pre-  
vent accidents and the driver  
who sails past without observing  
the sign is a menace to the safety  
of any others on the street. The  
Didsbury council took a step in  
the right direction by erecting  
stop signs in this town and it is  
to be hoped that the town will  
follow up the good work by very  
rigid enforcement of the new  
bylaw.

## Runaway

That runaway team of Connor  
Kenshull's strutted their stuff  
again last Friday when they got  
away and after a merry old time  
broke one of the plate glass win-  
dows in the Rossini hotel. It is about  
time that team started to observe  
the stop signs.

## Junior Club Field Days

Field days for members of junior  
farmers clubs have been the order  
recently, those having been held at  
Vermillion, school of agriculture,  
Lacombe experimental farm and the  
University farm at Edmonton. At  
all of these instructional work was  
given the junior members who at-  
tended in large numbers, in grain  
and livestock work.

## WEEKLY JOKE

In a certain church in Ireland a  
young priest was detailed to preach.  
The occasion was his first appear-  
ance, and he took for his text: The  
Feeding of the Multitude. He said:  
"And thus fed two people with ten  
thousand loaves of bread and ten  
thousand fishes." And Irishman  
said, "That's an miracle, begorra, I  
could do that myself," which the  
priest overheard.

The next Sunday the priest an-  
nounced the same text, but he had  
it right this time. He said, "And  
thus fed ten thousand people on  
two loaves and ten fishes." He  
waited a minute or two, then bowed  
well over the pulpit and said, "And  
couldn't you do it, Mr. Murphy?"  
And Mr. Murphy replied, "And  
sure, your Reverence, I could.  
The priest then asked, 'And how  
could you do it, Mr. Murphy?'  
To which he replied was 'And sure,  
Your Reverence, I could do it with  
what was left over from last Sunday.'

## Burnside Notes.

Mrs. Melvin Becker, Howard,  
Albert and Miss Celina Dedele of  
Didsbury, and Miss Jean Spencer  
of Stett, were Sunday visitors at the  
home of Mr. George Metz.

Mr. Noah Eckel took in the Stett  
for Three Hills ballgame at Three  
Hills on Wednesday last.

Mr. Jim Reynolds of Calgary is  
spending the harvest with Mr. Geo.  
Metz.

Miss Bertie Metz spent last Mon-  
day with her sister Miss Gretta  
Metz at Bert White's, Bancroft.

Mr. Reg Jamieson who had been  
working on the P. Burns ranch at  
Cochrane, is helping his uncle, Mr.  
A. E. Thompson, with the harvest.

Doris Jenkins who broke his fin-  
ger in the ballgame at Sunnyslope  
sports, says it's almost as good as  
over again.

Mr. Harvey Viney of Allingham  
who took very ill Tuesday was taken  
to the hospital and is much im-  
proved and able to return home again.

Mr. and Mrs. D. W. Thomsen,  
Samuel and Ruth are visiting with  
Saskatchewan friends.

Mr. Pete Friesen of Grand Prairie  
is spending the harvest with Mr.  
Noah Eckel.

Mr. and Mrs. John Topley and  
family spent Sunday at Bowden.

Mr. and Mrs. N. Eckel spent  
Sunday evening with Mr. and Mrs.  
Harvey Viney at Allingham.

## Alberta's Unemployment

Total unemployed registered at  
provincial labor bureaus was 8,595  
in the week of August 11, which is  
somewhat reduced from former  
figures.

## Wool Yield

A yield of 553 bushels of barley  
from 4.9 acres, an average of 72  
bushels per acre, was reported from  
the Smith farms, just east of Leth-  
bridge. The crop was grown from  
four bushels of elite strain of Trebi  
barley and weighed 55 pounds a  
bushel.

## Wool Scouring Plant

Establishment of a wool scouring  
plant valued at \$550,000, capable of  
handling the bulk of Alberta's an-  
nual wool clip, is now assured for  
the province, according to authorita-  
tive information available in Ed-  
monton. Just where the plant will  
be located is not yet decided. Four  
locations are being considered by  
the eastern firm handling the propo-  
sition, namely, Edmonton, Cal-  
gary, Lethbridge, and Medicine Hat.  
One of the main considerations is  
proper railway facilities for both in-  
ward and outward shipments. The  
annual wool clip of the province  
runs between 3,500,000 and 4,000,  
000 lbs. The largest proportion is  
produced in Southern Alberta, but  
there are a number of important  
producing areas in the central and  
northern parts of the province. It  
is stated that the financial arrange-  
ments for the plant have now been  
completed, and that installation will  
be commenced as soon as a definite  
location is arranged. The propo-  
sition is being closely studied by the  
provincial trade commissioner's  
office at Edmonton.

## Acres in Grains 1934

Tentative estimates of acreages  
of various grain crops in Alberta  
have been issued this week in com-  
pany with those of other provinces,  
by the dominion bureau of statistics.  
The figures for Alberta are as fol-  
lows: Wheat 7,501,000 acres com-  
pared with 7,980,000 last year;  
oats 2,820,000 acres; barley 749,  
000; rye 243,000 and flax 18,100.

## Scholarship Winners

Four members of Alberta junior  
livestock clubs have been granted  
scholarships at the Olds school of  
agriculture. They are Graham Mc-  
Farlane of Sexsmith, Virgil Black-  
more and Billy Lang of Lacombe,  
and Noel Heslop of Millet. The  
award was for general proficiency  
in their livestock club work.

## Fishermen's Luck

Mr. and Mrs. W. W. Gillrie and  
Mr. and Mrs. H. Friesen visited  
the mouth of Stony Creek on Sun-  
day and managed a fine catch of 17  
grayling and two trout.

Mr. and Mrs. George Julien and  
daughter with Margaret Phillipsen  
left town Saturday to visit at the  
Axtell home on the Raven. Gray-  
ling was their objective.

Messrs Tom Johnson and Jim  
Kirby got a fine catch of grayling  
in the Raven on Sunday.

Messrs. Chas. Mortimer and Jim  
Hulton travelled the Stony Creek  
Sunday and caught a fair mess of  
trout.

The biggest fish reported during  
the past two weeks were caught by  
Milt. Ford and Jim McGhee on the  
trip last week. Milt. got a trout  
about 23 inches long while Jim  
landed one about two inches small-  
er.

## Mountain View Notes

We are very sorry to hear of the  
misfortune of Mr. and Mrs. Dunkley  
in the loss of their home. Mrs.  
Dunkley (nee Miss Birdsall) was  
able to save a few of her valuables.

The monthly meeting of the W.I.  
was held at the home of Mrs. Bird-  
sall on Wednesday last. Mrs. J.  
Hill occupied the chair. Owing to  
the early harvesting many members  
were unavoidably absent. After the  
business session a very enjoyable  
time was spent. The next meeting  
will be held in Community Hall.

Mrs. Nielson entertained a few  
friends at tea Wednesday last in  
honor of her daughter Marie who  
returned on Sunday to complete her  
3-year course at the Calgary Holy  
Cross Hospital. The spacious room  
was beautifully decorated with the  
profusion of summer flowers. The  
invited guests were Mrs. Benny  
St. Clair, Mrs. E. St. Clair, Mrs. B. A.  
Atkinson, Mrs. J. Hill, Miss M. Hill,  
Miss St. Clair, Mrs. J. Devolin and  
Mrs. Stanton. During the after-  
noon Miss Stella Nielson delighted  
the guests with several pianoforte  
selections.

## CHURCH ANNOUNCEMENTS

### M.B.C. CHURCH

Rev. F. Vinson, Pastor.

#### Sunday Services:

1:30 p.m.—Sunday School.

2:45 p.m.—Praying Services.

7:15 p.m.—Praying Service, including Young People's meeting every alternate Sunday.

Wednesday Evenings, 8 o'clock.

Prayer Service.

"Search the Scriptures"

### EVANGELICAL

Rev. H. J. Wood, Pastor.

#### Sunday Services:

10:30 a.m. Morning Worship.

11:30 a.m. Sunday School.

Held in the M.B.C. Church.

Monday Evening, 7:15 p.m. Senior.

Held in the Knox United Church.

The sermon subject next Sunday morning will be, "Citizens of Two Worlds."

A Hearty Invitation is Extended to All.

### UNITED CHURCH

Rev. A. J. Mitchell, Minister.

11 Family Sunday School, 7:20 p.m. Service. The minister will preach Sunday at Westcott at 10:30 a.m.

#### LUTHERAN CHURCH

Rev. J. J. Kurling, Pastor.

Vestry: English Every Sunday 11 a.m. except the fourth Sunday.

German: First third and fourth Sunday at 10 a.m.

Bible: German Every Sunday at 2 p.m. except the fourth.

English Every Sunday at 8 p.m.

### CHURCH OF ENGLAND

Rev. A. D. Currie.

There will be no service on July 29th, August 1st, Evensong by Royal Dons, 7:30 p.m.

None of any other services will be given later.

The Rectory will be closed until the end of August. Letters will not be sent until September 1st.

#### WEEKLY SERMONETTE

There is not a whole lot of character in giving a quarter and expecting fifty cents worth of gratitude in return.

### Vacation Bible School Program & Exhibition.

The Vacation Bible School will give a program and exhibition of its work tomorrow evening (Friday) in Knox United Church at 8 o'clock. Certificates will be issued to the graduates.

One of the features of the program will be a dramatization from the book of Ruth.

The parents and the public are invited. A silver offering will be taken.

**WITH CANOE AND PADDLE**  
ON CANADA'S  
WATERWAYS

**CHANGE** is the passport of a vacation and a canoe trip in Canada is one method by which the stress of daily life can be exchanged for a tranquil, serene existence. It may be for a limited time only but its effects are felt all the year round. Sunlight, coolness, music of birds, and peaceful and vitalized air have no place in the life of the canoeist.

A large number of interesting waterways which one can travel for days and nights are outlined in "Canoe Trips in Canada," a booklet recently issued by the National Parks of Canada, Department of the Interior, Ottawa. Following the trip described there, one can drift lazily along or race for the strenuous joys of the canoe. There are courses which lead for a hundred miles through canals, rivers and lakes with alternating civilization and lonely wooded country. There are long, smooth flowing rivers and placid lakes out of Canada.

## An Inspiring Sight

The prairies of Western Canada during this year of grace, 1928, have been a joy to behold. In the early summer following the June rains, the tender verdant green of the recently sown grain rows presented a restful picture full of promise for the future. As week followed week of almost ideal growing weather, with only an occasional storm affecting restricted areas, and an absence of rust and insect pests, the early promise of a beautiful crop grew steadily into a certainty.

Inspiring as the prairies were in early spring and the first days of summer, and full of promise as they were, as the crops became taller and the heads began to develop, and as they swayed to the passing breeze, it is in the late summer and early fall months that the West really comes into its own and presents a picture which few places in the world can rival and none surpass.

This article is written in mid-September when days of unsurpassed sunshine prevail, each day closing with a glorious sunset, the promise of still another day of perfect harvest weather to follow. The writer has just completed a motor trip through hundreds of miles of grain fields. And what a sight! If the pessimists of our Dominion could make such a trip surely their croaking voices would be silenced.

Speeding along almost perfect roads, about only well graded dirt roads, whether over prairie as level as a billiard table, or with the feeling of a bird rising and dipping as the car speeds over more rolling country, dropping into a valley here and winding up through the hills, only one sight reaches the eye, and that panorama extends unchanged as far as the eye can reach, a seemingly limitless expanse of yellow golden grain. The whole country is golden yellow.

And no great industrial city in the world can show a scene of greater activity. On all sides can be heard the click and clatter of the binders as they cut down the ripened grain, and with automatic carelessness toss the bound sheaves to one side ready for the stackers. With amazing frequency the sight is witnessed of the newer combine—reaper and thrasher—some using the another attachment, others threshing the grain in the big machines move onward with the possibility of a tank in modern warfare. In some fields the harvest hands are busy in groups gathering the sheaves into shocks; across the road a threshing gang is at work, horses hauling great trucks or stock-loading machines, pitchforks, engines, firemen, drivers, all covered with dust and working at high pressure to accomplish a maximum of work before daylight falls.

And as one speeds along the road it becomes a necessity to slow down and turn out every few minutes as we pass, or allow to pass, a box wagon or motor truck loaded to capacity with the wheat being hurried to the elevators, those far from artistic but essentially modern and practical adjuncts to twentieth century grain raising and marketing. Every road is alive with them, great wagons drawn by teams, double teams, horses three abreast, countless two motor trucks, strings of wagons hauled by a tractor, driven by old men and young boys hardly in their teens, women and girls, all headed to the nearest railway station.

And these small prairie towns and villages through which we pass every eight or ten miles all present the same scene of tireless activity. The loader grain wagons and trucks are lined up awaiting their turn to reach the elevators, while the "putt, putt" of the engines testify to the energy with which the elevator operator is striving to keep up with the golden stream pouring in upon him. At the same time is heard the "chirr" of the grain as it is emptied through the elevator chutes into the waiting freight cars. All night long the elevators struggle with the gigantic task before them and through the night the long trains plunge through the darkness hurrying to the proceeds of the farmers' toil to the hungry markets of the world.

And where are these lines of thousands of harvesters from Eastern Canada, British Columbia, and the rubber-harvesters from over the sea, today only a few days ago thronged our cities and larger town distributing centers? Scattered singly or in groups they have been swallowed up in the grain fields of Canada's prairie provinces. They have been merged into and become a part of the Epic of the West. They are working hard, but they are, too, enjoying a glimpse of a new life and it is inconceivable that they will fail to become imbued with some of the courage, the optimism, the vision of this great new land.

September days in Western Canada! Glorious days, health-giving, wealth-giving.

## A New Wireless Wonder

Apparatus Supplies Heat Without  
Apparent Direct Contact

The latest performance in which wireless is employed consists of supplying heat to houses without cables, leading apparent direct contact between the heater and the heated body, and lighting lamps without any apparent electrical supply.

These are done by power obtained from a new short-wave vacuum tube. High frequencies are produced at

high power using a short-wave length.

Problems have been embodied in a glass tube and hung from the end of a metallic "antenna" that receives the transmitted power and converts it to the heat in the form of heat and cooks it.

New methods in electrical treatment are always being looked for by doctors. Perhaps in the future, the new apparatus will be used for imparting heat to the body to produce artificial "fever," one of Nature's most potent factors in recovery from many diseases.

## Explanation Is Simple

Exceedingly strange are the ways and whereabouts of names. Take, for instance, the letter "Q". How many of us have ever stopped to think or to ask ourselves why we call it "Q"? And the answer is just as strangely curious as the question. The name of the letter "Q" is from the French word, "quatre," meaning "four." "Q" is simply an "O" with a tail!

The present population of England and Wales has decreased from 20,000,000 in 1878 to 18,000,000 in 1928.

Will Kill Germs Found In Milk, Says  
Austrian Professor

Radio waves will kill germs found in milk according to a report received by the medical college of the University of California from Dr. Karl Seidel of the University of Vienna.

Research done by the Austrian professor indicated that intense radio beams of very short wave length will kill germs without affecting the milk molecules nor changing the natural flavor, the report says.

## HAD NO APPETITE

### WEAK AND DIZZY

This New Brunswick Woman  
Restored By Dr. Williams' Pink Pills

Mrs. James Delyea, Brown's Flat N.B., says: "I am writing to tell you the great good I had through the timely use of Dr. Williams' Pink Pills. My health had failed and I was troubled with great weakness. I had no appetite and frequently had dizzy spells. The least exertion would make my heart palpitate violently and I felt tired at all times. I had lost a great deal of sleep and was feeling greatly discouraged when I finally decided to try Dr. Williams' Pink Pills. The happy results following the use of this medicine were almost instantaneous by seeing that I was again perfectly well, able to do my house work and enjoy life once more. I feel it a duty to recommend Dr. Williams' Pink Pills to all weak people."

If you have any of the above symptoms above noted, do not delay, begin treatment at once with Dr. Williams' Pink Pills. You will be surprised to find the improvement in your condition after a few weeks. You can get these pills through any dealer in medicine or by mail at 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont. If you will send your name and address a 15c booklet, "Building Up the Blood," will be sent free.

## Ex-Kaiser Recovers Farms

Former Kaiser Wilhelm of Germany has won a suit for the recovery of two confiscated farms. The farms were seized by the Government of the Union of South Africa, in 1921. The case is considered important as setting a possible precedent for actions to recover the former imperial estate in other countries, notably in Poland.

Painless and perfect in their action, Miller's Worm Powders are always a safe and reliable remedy for children who show symptoms of worms. These symptoms are easily recognized, also in a feverish restlessness, frequently ending in convulsions. A point of notable importance is that after Miller's Worm Powders have expelled the worms, the stomach and bowels are found up into a very healthy condition.

## Intelligent Congressmen

Congressmen. We must have government and Congress does not realize how expensive it is to operate a ship. Why burn out alone cost American ships \$100,000,000 a year.

Congressmen. You ought to cut that dead down. Use a cheaper grade of kerosene, or get along with fewer of them.

When Asthma Comes do not despair. Turn at once to the help offered by Dr. J. D. Kellogg's Asthma Remedy. This wonderful remedy will give you the aid you need so surely, so quickly, so safely, so cheaply, so naturally and without effort. Others, thousands of them, have suffered as you suffer but have wisely turned to this famous remedy and ceased to suffer. Get a package this very day.

## Turks Are Progressing

Dictator Kemal Pasha is compelling the Turks to abandon the Arabic alphabet and to learn the Latin alphabet. Turkey is more progressive than the Irish Free State with its compulsory Gaelic. While the Turk goes forward the Celt goes back.

It Has Many Qualities. The man who possesses a bottle of Dr. Thomas' Eucalypti Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

Not by appointment do we meet delight and joy; they find not our expectancy. But round some corner in the streets of life they on a sudden clasp us with a smile.

Minard's Liniment For Every Pain.

## Milk May Be Sold In Sheets

Danish Farmer Has Invented Wonderful New Machine  
The world is used to several varieties of prepared milk and to milk powder, but shortly it will be made, and sold, in sheets.

A landed proprietor at Copenhagen has invented a device which extracts the water from fresh milk and leaves dry milk which comes from the machine in a form resembling sheets of rather heavy tissue paper. In this form the milk, it is stated, can be kept for years, and becomes "fresh milk" again by mixing it with clean water.

It is intended to build a factory to make this "sheet milk," which should be important to agriculture.

## Locating Rome

An American mother and daughter and made an exhaustive tour of the Continent. When they returned to their "home town" somebody asked the mother if they had been to Rome. "Yes, Sadie," said the mother to the daughter, "did we go to Rome?" "Why, mother," replied the daughter, "of course we did. Don't you remember that's where you bought the black silk stockings with the white clocks?"

Joseph Conrad, the novelist, could not speak English until he was 19.

There are 42,992 women employed underground in the mines of Japan at present, and new regulations provide that no more shall be so employed.

The hardest part about knowing some people is to conceal your opinion of them.

## Weatherproof

Dry batteries last longest when protected from wet or damp. Eveready Hot-Shots give you full value for your money, because they are housed in metal cases.

Before you buy a battery for ignition in exposed places, make sure it bears the name "Eveready Hot-Shot." Other batteries may resemble these famous power plants in appearance, but only Eveready can make the genuine Hot-Shot.

The Eveready Ignitor shown on the left is the longest lived single dry cell money can buy. It is for use indoors or under cover.

## Indian Had Heck of a Time In Wildlife Automobile Drive

"Did I have a heck of a time or did I have a heck of a time," gleefully murmured Cyrus Point, Indian, before he appeared in police court at Vancouver recently. He did.

Appropriating a friend's car he started on a wild ride down Hastings street. Turning down Carroll street, he ran smack into a religious meeting. The crowd scattered in all directions with the exception of Miles Horace, 60, who was knocked down and slightly injured.

Abandoning the car, Point fled on foot but was found in a basement nearby, pleading guilty in police court to driving a car while intoxicated. Point was remanded for sentence. —Calgary Herald.

## More Money for Highways

Completion of the Edmonton-Jasper Park Highway as an all-weather route, and the completion of the necessary reconstruction on the upper end of the Calgary-Banff Park Highway, is largely assured as a result of arrangements made with the federal government by Hon. Geo. Headley for a vote totaling \$125,000 marked for the Jasper road and \$150,000 marked for the trans-Canada highway in Alberta. The latter provided for work both east and west of Calgary. In addition, the federal government has granted a vote of \$100,000 monthly to Alberta for direct relief, which is somewhat larger than had been expected. Some of the work on the two park highways will be done this season, but some of the construction work necessary, chiefly that on the Jasper road, will not be possible till next season.

## Farmers Alive to Use of Good Seed

There never was a time when farmers were more alive to the desirability of the use of good seed than now, stated W. T. G. Weiner, secretary of the Canadian Seed Growers' Association, on a recent visit to Alberta. Last year the association was sold out of seed by the middle of March, said Mr. Weiner.

## Broom Corn at Taber

Satisfactory production of broom corn for use in the manufacture of brooms has been established on the irrigated section surrounding Taber, in southern Alberta this season. Some 400 acres have been grown under contract with a firm at Regina which will utilize the material. The crop was recently inspected by officials of the concern and found to be in excellent shape. Some of the crop stood as high as eight feet.

## License Milk Dealers

Licensing of all milk and cream dealers serving the cities of Calgary and Edmonton has been put into effect by the provincial public utilities board. The action aims at the closer control of supply and the more definite control of price cutting and rebating.

## Here and There

One graduate of the Anglican Theological College of British Columbia and four undergraduates are out for a summer of adventure and quiet shore enjoyment recently aboard Canadian Pacific Canada liner, "Princess" "ask" for the Yukon. Her 10-odd passengers also included miners, prospectors and northern railway and steamship men going in for the season.

## CARD OF THANKS

We wish to thank our neighbors and friends for their kindly help and the sympathy shown us in our recent sad bereavement.

—Mr. and Mrs. T. W. Stubbs.

## LOCAL & GENERAL

Rev. and Mrs. Mitchell were Calgary visitors last Monday.

Mr. Eric Schwesinger spent Friday last at Sylvan Lake.

Good quality writing pads of first class paper—100 sheets per pad 25c.—Pioneer Office

Mr. and Mrs. Sam Franklin are spending their vacation at Vancouver.

Mr. A. M. Davey of Moose Jaw was a visitor at the Roids home for a few days this week.

Don't forget Ranton's Big Dollar Days this weekend—Saturday and Monday, August 25 and 27.

Miss Margaret Ranton of the Bank of Montreal staff, Lacombe, is vacationing at her home here.

Mr. and Mrs. B. T. Gage accompanied by Mrs. C. Konechuh, spent a few days this week at Sylvan Lake.

Mr. Jack Currie of Innisfail was a visitor at his home here Sunday on his return to Innisfail from his vacation at Spokane.

Mr. and Mrs. Wm. Watt and daughter Janet of Innisfail were Sunday visitors with Mr. and Mrs. Herman Hawkes.

Mr. and Mrs. I. Kalbfleisch and family of Three Hills were visitors on Sunday with Mr. and Mrs. George Liesmer.

Mr. Sid Willis had as his guest during the past week his granddaughter, Miss Helen Heworth of Bonners Ferry, Idaho.

Big improvements are noticeable at the local C.P.R. depot since the painters got busy on the office. The platform also is receiving attention.

Mrs. J. A. Russell, Miss Jean and Mrs. Herb Rennie left Thursday for Vancouver where they will visit for two weeks.

Mr. and Mrs. Archie Melick of Vancouver are visiting Mrs. Melick's mother, Mrs. John A. Mortimer.

Miss A. E. Korf of Vancouver, a former principal of the Public School here, spent Monday and Tuesday visiting with Miss Ferguson and other friends in town.

Sustaining nasty bruises when he fell off a load of wood last Friday, Mr. Gibson, Sr., is reported to be on his feet again apparently none the worse for his trouble.

Mr. and Mrs. L. R. Pack, of Raymond, Alberta, are spending the present week at the home of Mrs. Pack's parents, Mr. and Mrs. Jas. Shells.

Mr. Frank Raymond of the Royal Bank of Canada staff who has been on a two weeks vacation at Gull Lake and a month relieving duty at Alton has returned to his duties at the local branch.

Mr. and Mrs. H. M. Reiber, Mr. Florence and Arthur with Mr. and Mrs. J. E. Liesmer and family returned home last Friday from an extended motor trip through California and Mexico.

Miss Bessie Pherson of Calgary is a guest at the home of Mr. and Mrs. C. H. Mardon until the end of the month when she will return to Calgary where she attends a school. Miss Pherson is a granddaughter of Mr. O. I. Harner, of the Wigwam, Calgary, and formerly of the Roseland Hotel here.

A number of the little tots of the town gathered at the home of Mr. and Mrs. Tom DeWitt on Monday to honor Mrs. Shirley DeWitt on the occasion of her fifth birthday. A very enjoyable afternoon was spent in playing games and all the children enjoyed an abundance of ice cream and tasty delicacies provided by Mrs. DeWitt.
